What is claimed is:

- 1. A composite material comprising:
 - (a) a first layer which comprises a surfactant component, surfactantgenerated microcells, a gel catalyst component and a binder component; and
 - (b) a second layer comprising a metallic component adhered to the first layer.
- 2. A composite material comprising
 - (a) a substrate;
 - (b) a first layer adhered to the substrate to provide a coated substrate, said first layer comprising a surfactant component, surfactant-generated microcells, a gel catalyst component and a binder component; and
 - (c) a second layer comprising a metallic component adhered to the coated substrate.
- 3. The composite material according to claims 1 or 2 wherein the first layer further comprises a filler component.
- 4. The composite material according to claim 2 wherein said substrate is planar and said first layer is adhered to one side of the substrate.
- 5. The composite material according to claim 2 wherein said substrate is planar and said first layer is adhered to both sides of the substrate.
- 6. The composite according to claims 4 or 5 wherein said second layer is adhered to one side of said coated substrate.
- 7. The composite according to claims 4 or 5 wherein said second layer is adhered to both sides of said coated substrate
- 8. The composite material according to claims 1 or 2 further comprising a water repellant material.
- 9. The composite material according to claims 1 or 2 further comprising an antifungal material.
- 10. The composite material according to claims 1 or 2 further comprising an antibacterial material.

- 11. The composite material according to claims 1 or 2 further comprising a surface friction agent.
- 12. The composite material according to claims 1 or 2 further comprising a flame retardant material.
- 13. The composite material according to claims 1 or 2 further comprising an algaecide.
- 14. The composite material according to claims 1 or 2 further comprising a dye.
- 15. The composite material according to claims 1 or 2, wherein the metallic component is selected from the group consisting of aluminum or stainless steel.
- 16. The composite material according to claim15 wherein the metallic component is aluminum foil.
- 17. The composite material according to claim 3 wherein the filler comprises clay.
